PROFILE

- Capital markets and AI Augmented Fintech Specialist, holding certifications including **CISI Level 3**, **University of Geneva's Understanding Financial Markets**, **Google's AI Professional Certificate**, and **Anthropic's Claude Code in Action** — backed by hands-on experience in fintech and building real-world automation solutions.
- Technical consultant in financial technology with expertise in designing, developing, and supporting trading systems using FIX messaging protocol, Java, and SQL. Proven track record of enterprise application deployment, production support, and cross-functional client collaboration across Europe, the Middle East, Singapore, and Malaysia.
- Additionally experienced as a Unity developer, having delivered AR/VR applications, multiplayer racing games, and interactive educational simulations — with strong proficiency in C# and immersive technology development across the full project lifecycle.

WORK EXPERIENCE

FinIQ Consulting Ltd, Pune, India
Technical Consultant

MAY 2024 - DEC 2025

- Worked on Forex Options and Structured Products**, including FX vanilla and barrier options, option strategies (straddle, strangle, risk reversal), and products such as Accumulators, Decumulators, and Dual Currency Investments, supporting the full product lifecycle.
- Developed and optimized SQL stored procedures** for pricing calculations, data processing, and FIX message generation to support inter-bank communication.
- Contributed to C# and Java price aggregation engines**, enabling best-execution through consolidation of multiple bank quotes.
- Performed system testing and pricing validation, including FIX message verification, defect analysis, and test case documentation; supported UAT and production releases.
- Supported integrations and deployments for global banks** including J.P. Morgan, Bank of America, HSBC, Deutsche Bank, EFG, and Standard Chartered.
- Maintained UAT, pre-production, and production environments**, ensuring stability through monitoring, data archiving, and issue resolution.
- Managed Forex demo and testing environments, supporting client demonstrations and troubleshooting.
- Served as Pre-Production and Release Manager for the Forex Derivatives team**, overseeing release validation and controlled production deployments.

Sector4 Interactive
Unity Developer

MAR 2023 - JAN 2024

- Developed AR/VR and single- and multiplayer applications using Unity and C#**, handling full lifecycle delivery from design to deployment.
- Built a AAA racing game with multiple modes, multiplayer features, UI systems**, achievements, and 40+ levels with varied vehicles.
- Delivered AR/VR solutions including a Toyota web-based AR treasure hunt, a VR chemistry lab simulation**, and an endless arcade racing game with controls, scoring, and leaderboards.
- Contributed to testing, AI tuning, performance optimization, UI design, gameplay logic**, and defect resolution to ensure stable, production-ready builds.

EDUCATION

B.Tech Computer Science and Engineering
Muthoot Institute of Technology and Science
Kerala, India

2018 - 2022

Higher Secondary(XII)
JSS Private School
Dubai, UAE

2016 - 2018
